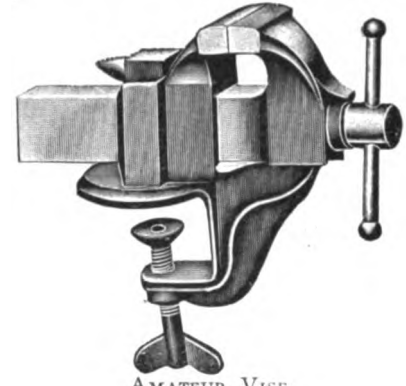
Amateur Vises

The Leavens Mfg. Co., Vineland, N. J., are offering the trade a complete line of Amateur Vises, one of which is illustrated. The makers state that each Vise is nicely fitted, comes up square on the face of the jaw, the screw works smoothly and easily, as they use a loose malleable iron nut, the same as is employed in all machinists' vises. This, however, is said to be a new feature in Amateur



AMATEUR VISE.

Vises. Another feature is the solid screw. In finishing a brown baking japan is used instead of black air-drying japan. The brown japan and the high polish give to the Vises an attractive appearance

"Jersey Vises"

A complete line of High Grade Amateur Vises, both Steel and Iron Jaws. We have a Vise proposition for live Tool Dealers. Better send for it.

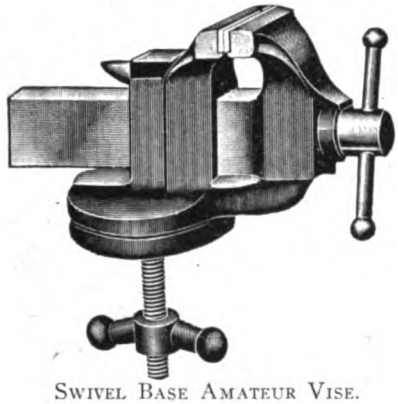
Vineland, N. J.

"Jersey" Vise Display Stand

The Leavens Mfg. Co., Vineland, N. J., are offering the trade the "Jersey" Vise Display Stand, illustrated. It is a compact construction, as it occupies a counter space 14½ inches square. The revolving wheel has a capacity for 16 Vises. The wheel revolves readily, so that any Vise can be easily examined. The Stand is sent out with an assortment of 36 Vises. This assortment, as made up by the factory, has from 1½ to 3-inch in plain iron jaws, and from 1½to 3-inch in steel face jaws, and from 1¾-inch to 3-inch with swivel base and steel face jaws. They are finely finished and are substantially made, and are said to embody all the features of a machinist vise, something new in an Amateur Vise.



SWIVEL BASE AMATEUR VISE.

The swivel base Amateur Vise has a steel face; the jaws come up square on their face; the solid screw works smoothly and easily, as a loose malleable iron nut is employed. The Vise is finished in a brown baking japan, giving a neat appearance. The anvil and the jaws are highly polished.
